Car Ventilation Lattice

- Lets fresh air into the car
- Continuously adaptable to all window widths
- Plastic
- Colour: Black

Please note that cars can heat up considerably in a short time due to even slight sunlight, even at moderate outside temperatures. Care should also be taken when windows and/or trunk lid are open. To ensure air circulation, it is necessary to open the car in at least two places, with the help of two fresh air grilles in combination with the car cooler. In addition, find a shady parking spot, provide your dog with fresh water and leave him alone for only a few minutes, if at all.

Ingredients of the cooling liquid: water, carboxymethylcellulose sodium, preservatives
Tip: Do not use in the sun. Do not use or store at temperatures over 45 °C. The gel contained might get too hot and turn liquid, and as a result lose its cooling effect. Moisture can form on the cooling mat due to temperature fluctuations. Therefore, we recommend that the mat is not folded or stored in the original carton, but spread out and dried with a cloth if necessary. The shelf life depends on the storage and treatment of the product.
